## **Kyma and OSEMI Partner at SEMICON China 2007**

Raleigh, NC / March 19, 2007 – Kyma Technologies, Inc. (Kyma) and OSEMI Inc. will join forces at SEMICON China to market both companies products. SEMICON China will be held later this week at the Shanghai New International Expo Centre in Shanghai, China.

David Braddock, founder and CEO of OSEMI, and Keith Evans, president and CEO of Kyma, will be on hand at OSEMI's tradeshow exhibit booth to discuss Kyma's growing product line of low defect density gallium nitride (GaN) and aluminum nitride (AlN) substrates and related products and services.

OSEMI has been marketing Kyma's advanced crystalline gallium nitride (GaN) and aluminum nitride (AlN) substrate materials and related products and services in China since mid 2006.

### **About Kyma Technologies**

Kyma was spun out of North Carolina State University's Materials Science and Engineering Department in 1998 to pursue the development of gallium nitride (GaN) and aluminum nitride (AlN) substrates for a broad range of high performance nitride semiconductor device applications. Kyma's substrates have great potential to enable critically needed improvements in device cost, performance, and reliability and thus are expected to replace most foreign substrates such as sapphire and silicon carbide for the most demanding applications.

Kyma's diversified product offering includes: ultra-low defect density native (free-standing) GaN in customer-defined orientation including c-plane and non-polar, GaN and AlN templates grown on sapphire and other substrates, and ultra-high purity polycrystalline GaN.

The market for nitride semiconductor devices is expected to surpass \$9B by 2010. The combined market for GaN and AlN substrates is expected to surpass \$500M by 2010.

For more information about Kyma Technologies, please visit our website [www.kymatech.com](http://www.kymatech.com), send us e-mail at [info@kymatech.com](mailto:info@kymatech.com), or call the company directly at 919.789.8880.

### **About OSEMI**

OSEMI Inc. is a diversified supplier of advanced compound semiconductor materials, devices, equipment and services. Headquartered in Cannon Falls, Minnesota of the USA, OSEMI has a growing international presence including facilities in Sherbrooke, Canada and Beijing, China. For more information about the company visit [www.osemi.com](http://www.osemi.com) or call the company headquarters at 507-285-4490.

### **About SEMICON China**

SEMICON<sup>®</sup> China is the premier semiconductor industry tradeshow in China. It is the longest established tradeshow in China dedicated to semiconductor manufacturing. In the last five years the number of visitors has grown over 600 percent, from 4,000 to over 25,500 attendees and the number of exhibitors has increased as well—from 208 companies in March 2000 to over 1,100 companies exhibiting in 2006. Visit [http://wps2a.semi.org/wps/portal/\\_page/130/\\_page.130/514](http://wps2a.semi.org/wps/portal/_page/130/_page.130/514) for more information on the tradeshow.
